

# Sette 270

CONICAL BURR GRINDER

We are excited to introduce this new conical burr series that debuts a revolutionary new grinding technology.

Designed and perfected in Liechtenstein over a period of 8 years, this technology sets a new standard in simplicity, efficiency, and durability. This new mechanism has the outer burr rotate and the inner burr is fixed, a truly revolutionary design. The design of this mechanism doubles the efficiency of similarly sized grinders. Coffee passes straight thru the grinder, vertically, and drops directly into the grounds bin or your portafilter.

The Sette has a macro/micro adjust for grind size, as well as 3 programmable settings for dosing. These combined features offers the user incredible repeatability. A built-in convertible holder allows you to grind directly into your portafilter, the supplied grounds bin, or most of the popular brewing devices (Hario, Clever, Able Kone, AeroPress®) – a standout feature amongst all other home grinders.

**FEATURES**

**GEAR BOX:**

Using a combination planetary gear box and a patented crown gear drive system, we achieve a 19:1 speed reduction.

**CONICAL BURRS:**

Manufactured in Liechtenstein, the 40mm conical burrs grind coffee at 3.5g to 5.5g/sec. depending on the setting. These conical burrs are durable and will remain sharp for many years. The adjustment mechanism provides precise burr alignment ensuring accurate grinding.

**DIGITAL CONTROL PANEL:**

The front mounted control panel with backlit LED display is user friendly. Three programmable buttons allow for grind time settings within 0.01 seconds. Simply press the START button and the Sette automatically delivers precise dosing.

**MINIMAL RETENTION:**

To maximize freshness, the Sette minimizes the ground coffee left in the grinder.

**GRIND ADJUSTMENT:**

The Sette has 31 macro adjustment steps, grinding from espresso to manual brew. A stepless micro adjust with 9 indicators allows the user to accurately dial in a perfect espresso. The macro/micro mechanism is directly connected to the cone burr resulting in immediate and true grind adjustment.

**CONVERTIBLE DEVICE HOLDER:**

A built-in convertible holder allows you to grind directly into your portafilter, the supplied grounds bin, or most of the popular brewing devices (Hario, Clever, Able Kone, AeroPress®) – a standout feature amongst all other home grinders. The Sette’s grounds bin is made from an anti-static plastic, with a molded spout for easy pouring into your preferred brewing device. The adjustable portafilter arms can accommodate most sizes of portafilter and includes an integrated hook for stability

**HOPPER:**

The hopper holds approximately 10oz (300–400g) of coffee. An innovative bean shutoff feature in the collar permits no-mess, no-fuss hopper removal for changing out beans.

**BREWING METHODS:**

The Sette 270 is exceptional for all brewing methods, from espresso to manual brew.

**MOTOR:**

A powerful, high torque DC motor drives the Sette. The circuitry is equipped with an automatically resetting, thermal cutoff switch.

**DIMENSIONS:**

The Sette Series is designed with a small footprint (like our other models) that fits under standard kitchen cabinets.

**CLEANING:**

The cone burr is easily removable with no tools, making cleaning very easy.

**ACCESSORIES**

**HOPPER EXTENDER:**

An extension that can add 10oz of capacity to the existing 10oz bean hopper. Several extenders can be added to get to the capacity you need.

**SPECIFICATIONS**

<b>Speed to Grind</b>	fine: 3.5g/sec / coarse: 5.5g/sec	<b>Power Rating (North America)</b>	120 V AC 290W 50/60 Hz. 2.4 Amp
<b>Burrs</b>	40mm steel burrs by Etzinger	<b>Power Rating (other)</b>	230 V AC 280W 50/60 Hz. 1.2 Amp
<b>Bean Hopper Capacity</b>	10oz (300-400g)	<b>Design &amp; Engineering</b>	Seattle, WA, USA
<b>Grounds Bin Capacity</b>	5.5oz (160g)	<b>Burr Manufacturing</b>	By Etzinger in Liechtenstein
